Full Description: tenon head.

Paste Group:

Thickness 17.6cm

Handle width:

Form:

Height: 29.1cm

Handle thickness:

Width 23.5cm

Diameter

Verbal Description: Tenon head for supporting sculpture protruding from architecture. The ^{triangular} face where the sculpture would be is flattened - either broken off or deliberate. Head is bigger than tail part that would be imbedded in construction. Tail has 2 fairly flat sides and a rounded side. End is flattened. Orientation difficult to determine. Whole piece has been roughly shaped, but not smoothed or worn. One corner of face is broken off.
